White, B.L., *The Technology Assessment Process: A Strategic Framework for Managing Technical Innovation*, 417

Subject Index to Volume 37

Cognizers
  neural networks and machines that think, 95

Decision process, strategic, 335
Delphi method
  as a learning instrument, 399
Delphi questionnaires
  versus individual and group interviews, 293
Developing nations
  technology-based environment health risks in, 159
Development
  new indicators, 213
Development planning, national
  an institutional approach, 321

Economism
  and new indicators of development, 213
Environmental health risks, technology-based
  in developing nations, 159
Environmental scanning
  a New Zealand application, 371

Fundamental science
  recruitment and accomplishment in, 39
Futurists, 311

Global goals
  for the 21st century, 305

Innovation diffusion
  probability distributions, 355

Linear planning models
  adding robustness through simulation, 139
Logistics
  at the International Institute for Applied Systems Analysis, 409
Long waves
  and technological transformation, 1, 111

Research and development investment,
  corporate and institutional ownership, 59

Scholarly exchange
  North–South, 99
Science and technology planning
  methodology based on economic scenarios and Delphi techniques, 383
Semiconductors
  structural change and competitiveness in U.S. industry, 85
Software, research
  development, 235
Space exploration
  organizational structure, training, and selection of crew members, 203
Spatial transformation
  and technological innovation, 181
Strategic planning, 103
Switching systems
  leapfrogging in, 77
Systems theory
  and new indicators of development, 213

Technological change, rapid
  as myth, 415
Technological innovation
  framework for managing, 417
  research strategy in management, 267
  and spatial transformation, 181
Technological race
  winners and losers, 315
Technological transformation
  and long waves, 1, 111
Technology transfer
  from universities and research laboratories, 251
Telecommuting
  research software development, 235
Tire cord textiles
  development of a technological S-curve, 275
